

7 Edger Sander

The Bona® 7 Edger Sander offers the professional flooring contractor all the features you would expect in a commercial-quality machine. Designed to be user friendly and provide quality results at an outstanding, affordable price.

The 7 Edger is constructed of highly polished aluminum alloys for rugged use and clean, neat operation. It is precision balanced with non-marking, stainless-steel, swivel bearing wheels which provide smooth flow and handling. An internal swivel bag support system makes this edger ideal for tight closets and stair treads.

The oversized dust collection system produces virtually dust-free edging. A non-marking disc guard and light make this edger a real work saver.

The 7 Edger Sander comes complete with a 1-year warranty, 25 feet of non-marking cord, and an owner's manual.
