

# AdvantEdge Edger

Innovative technology for smoother operation, more efficient power and easier maintenance is why the AdvantEdge edger is revolutionizing hardwood floor sanding.

Designed and engineered for operation with Bona DCS® systems, the AdvantEdge provides effective dust pick up even when using a bag.

Other features include:

### Advanced motor technology

- No motor brushes—less maintenance
- More efficient use of power—runs at 9 amps
- Unique electronic controller automatically increases torque as needed
- Soft start technology prolongs life of components
- Smart switch safety feature—prevents accidental starts

### Smooth operating, flat cutting

- 7" steel disc—aggressive, flat cutting
- Belt driven means positive drive and quieter operation
- No gears=no grease, less vibration, less noise
- Urethane compound wheels
- Excellent balance—no torsion or twisting motion

From the brushless motor for less maintenance to its electronic controller for monitoring torque, the AdvantEdge combines the latest technology with an ergonomic design that makes it the easiest, smoothest edger on the market.

The AdvantEdge is the next best thing to getting someone else to do the edging.

## Technical Specifications

Motor .....2.4 HP, 115 volt brushless technology

Machine Weight ..... 27 lbs.

Sanding Disc Size ..... 7" standard

Sanding Disc Speed ..... 3200 rpm

Combination Sanding Disc ..... siafast backed or standard

Vibration Resistant Halogen Light • DCS Ready  
Accesses Toe Kicks • Non-Marking Wall Guard
