

# Atomic DCS<sup>®</sup>

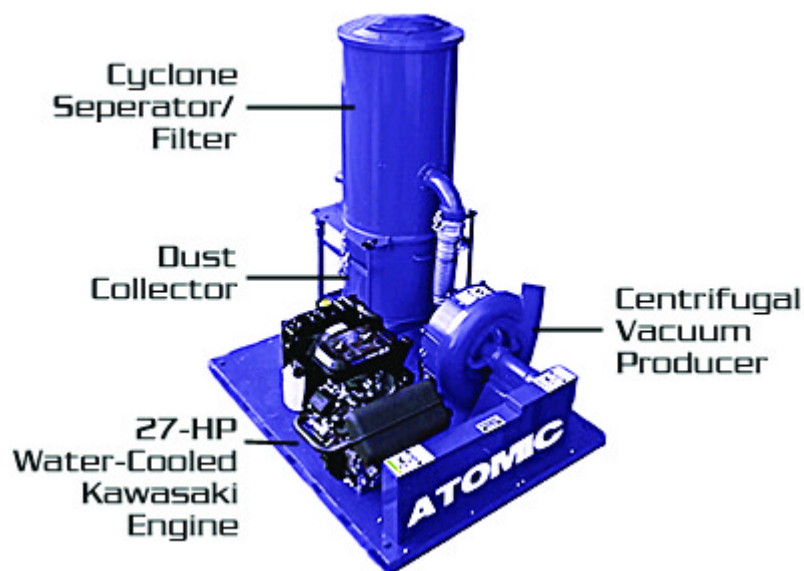

**The most advanced dust containment system for hardwood floor sanding**

---

## **What is the Atomic Dust Containment System?**

Mounted on a truck or trailer, the separate dust collector is powered by a 27-HP water-cooled Kawasaki engine. A 2-inch hose connects the sander, edger and buffer to the vacuum system located in a truck or trailer.

The innovative concept of the Atomic system, having a 27-HP engine outside of the customer's home significantly increases airflow. The result is a dramatically more powerful system, providing complete evacuation of the dust that is generated from the total sanding process.

## **Why dust containment?**

As consumers have become aware of their dust-free sanding choice and don't want to put up with the mess, dust containment has become an expected service. Instead of being just a competitive advantage for your business, in the future dust containment will be essential to your ability to compete.

The Atomic DCS is the ultimate for dust-free sanding providing:

- Increased customer satisfaction - eliminates the nightmare of dust throughout the home
- Higher quality results by eliminating airborne dust that would settle back down into the finish
- Dramatically increases the speed and efficiency of your work - increasing the profitability of each job
- Healthier working conditions - wood dust is a known carcinogen
- Plenty of power to run multiple machines effectively

**For the ultimate in dust-free  
hardwood floor sanding**

"The dust containment system eliminates all the airborne dust associated with wood floor sanding and refinishing. The proof is in the satisfied customers and the referrals we are receiving as a result of the system

"The Atomic system not only does a superior job of collecting the dust but it will (as advertised) run multiple pieces of equipment at the same time."

Randy Hoffman,  
V.P. Arvada Hardwood Floor Co.  
Aurora, Colorado

---

"This is the most profitable piece of equipment I've ever bought. The Atomic DCS paid for itself after the first two months."

Steve Crawford Owner  
The Floor Store  
Atlanta GA

## System Includes

The Atomic Dust Containment System can be outfitted with everything you need to start sanding right away.

- Your choice of trailer or truck package
- Atomic DCS with 27-HP water -cooled, Kawaski engine
- Hose reel with 300 ft. capacity
- 150 ft. 2" I.D. vacuum hose for sander
- 150 ft. 1.5" I.D. vacuum hose for edger / buffer
- 15 ft 1.5" I.D. vacuum hose with detailing end attachment

The vacuum hose is non-marking and smooth-bore on the inside. Smooth-bore means the inner surface of the hose is relatively smooth which further translates into less turbulence with the hose itself, maximizing the airflow.

The Atomic DCS can be installed in a box truck or trailer. In addition to top quality craftsmanship of the machine itself, we also provide you with our expert training on using and maintaining the Atomic DCS.

## Graphics Package

A mobile billboard for your business!

Truck graphics are included and will be customized with your company name, phone number and web site.

These full color graphics promote your company and the complete Bona "Environmental Choice" finishing system.
