

DCS[®]

Dust Containment System

Innovation In Floor Sanding Technology

Today, hardwood floors are more popular than ever; however, there has become a much higher concern that the products and procedures used in the finishing process be environmentally responsible. Until now the sanding process has always been a messy procedure, creating an enormous amount of airborne dust for the flooring professional as well as the consumer.

With Bona DCS[®] Dust Containment Systems' state-of-the-art equipment systems for screening, abrading and edging wood floors, the sanding dust problem has virtually been eliminated.

Bona DCS[®] is a totally integrated system designed for maximum dust control during the sanding process. The fully contained system combines efficiency, convenience and peak performance. Each piece of equipment within the system plays an integral part in the total dust containment procedure.

**For the ultimate in dust-free
hardwood floor sanding**
